Solid defense against allegation report; maintain Buy

Solid defense against allegation report Sound Global (SG) has issued a clarification announcement with a solid defense against Emerson's Analytics' (EA) allegation report. Key highlights: 1) SG's auditor Deloitte has confirmed that there is no change in their audit opinions on SG's prospectus and financial statements during 2010-13; 2) The missing EPC contracts that EA was unable to find were under direct negotiation with local governments and SOEs; 3) The CR appraisal report used the wrong classification for business segments and Chinese GAAP, which is the main discrepancy when compared to the financials reported under IFRS; 4) The company undertook BT construction of the pipe network and pump stations related to the BOT water projects. The apparent "delay" in revenue booking was mainly because the formal commencement date of the BOT projects was in 2013/14; 5) Regarding the Jingzhou Project, SG did start the project in Feb 2008. The company admits that the late approval from the shareholder meeting for the connected transaction was a minor failure in its corporate governance and says it will improve; 6) Management stated that: i) the company will conduct a share repurchase; ii) Chairman Wen Yibo will increase his stake in the company in order stabilize the share price.

Easy defense against EA's weak comeback Shortly after SG gave its first clarification, EA issued another report to question the classification of "biggest customer". Management explained clearly that "biggest customer" referred to an external customer, and that was why revenue from Anshan BOT projects were treated as being from an internal customer. It is common for short sellers to issue follow-up reports. Yet, we believe this one was weak.

Outlook remains sound During today's conference call, management promised to improve transparency for its EPC contracts. Another positive is that all previous EPC contracts were reviewed by HKEX, who have raised no further questions. Meanwhile, management targets to increase revenue from its operation segment to over 30% of total revenue in three years and maintains its acquisition target of 1mt in capacity for municipal wastewater treatment in the next five years.

Good buying opportunity We are satisfied with SG's clarification. The allegations from EA have been proved to be one-sided and without solid ground, in our view. We believe the detailed explanation in the company's announcement and management's strong determination to protect minority shareholders' interests should alleviate investor concerns. Although we believe SG's share price will remain weak in the short term, we expect it to pick up after SG announces a concrete share buy-back plan, or when management increases its stake. We maintain our Buy rating.
