Consumer Brands & Retail Gobal Luxury Goods Equity - Hong Kong

Prada SPA (1913 HK)

Hold: Don't get led into temptation

- Caution is well spread on the name but the devil knows what Prada can produce after very poor Q1 results; we resist the temptation of being more constructive for now
- Cutting EPS estimates by 24% and 19% for FY Jan 16/17 on margin collapse, wholesale weakness, FX and higher tax rate
- Cut fair value target price to HKD43 "only" from HKD48 as FX (HKD-denominated shares) and DCF roll-over limit the damage; reiterate Hold rating

Q1 results a major disappointment with consequences: Q1 to end-April saw sales in line (down 5% at constant FX with same store sales growth down high single digit as we had forecast), but EBIT was a massive miss as margins collapsed (down 910bp). EBIT margin deteriorated to 11% and this was driven by (i) a 150bp gross margin decline as a positive FX impact was more than offset by unfavourable product and geographic mix and (ii) a large 760bp increase in the SG&A ratio as cost containment measures are yet to bear fruit and marketing events were concentrated in the quarter. Although one could argue there were one-offs such as these marketing events, the reality is elements of the mix – underperformance of Greater China, of leather goods and of the Prada brand relative to Miu Miu - could well drag on.

What could make the stock work? Q2 and beyond should sequentially do better but we do not see any rush to become more constructive given the lack of visibility. However, there are factors that could support the stock and notably the second derivative of growth, ie momentum, things getting better or at least not getting worse. This is the reason we had become optimistic on the stock a bit prematurely earlier in the year. Besides, Prada is the least liked stock in our luxury coverage on the sell-side and the most shorted in the market. So whilst the results have been much worse than expected, we doubt the sentiment can become much more negative.

Changes to our estimates and TP: A few elements from Q1 have led us to cut our estimates significantly, notably a much steeper operating de-leverage than we had assessed, a poor wholesale outlook and a higher tax rate. FX has also become less favourable on the P&L than last time we published. We cut FY Jan 16 earnings by 25% but we are cutting our target price less (from HKD48 to HKD43) as we roll over our DCF by a year and FX is favourable at the share price level. With 14% upside to our fair value target price, we reiterate our Hold rating.

Resist temptation

- Poor Q1 results and consequences
- Some reasons not to sell
- Steep cuts in earnings, less so on target price

Q1 results and consequences

Very poor results

In spite of sales being in line both with consensus and HSBC estimates (down 5% at constant FX), Q1 EBIT was a massive miss as margins collapsed (-910bp). These lacklustre figures demonstrate that there is still a lot of work-in-progress at the Prada brand and at the Gucci brand within Kering (PRTP.PA, EUR154.70, Hold) compared to the LV brand within LVMH (LVMH.PA, EUR159.95, Buy).

Q1 2015 sales rose 6.5% on a reported basis to EUR828m but declined 5% at constant FX. On the positive side, significant FX tailwinds (+12%) contributed positively to sales. Retail net sales declined 5% at constant FX. SSSG was down "high single digit" in Q1 (vs HSBC -8.5%) compared to c -10% in Q4 (ended January). Wholesale (only 8% of sales now) declined by 13%.

Retail sales by region at constant FX were as follows: Europe (+10%) was supported by tourist flows (Asian but also the US) except in the UK due to the strong GBP. Asia Pacific (-17%) was penalised by Greater China (-23%). The Americas (-5%) suffered from unfavourable FX affecting tourism. Japan was only down 2% in spite of the tough basis of comparison. The Middle East (down 8%) lacked tourists.

By brand at constant FX (retail): Prada sales (-7%) were impacted by the weakness in Greater China and the tough basis of comparison in Japan. On the other hand, Miu Miu sales (+5%) grew at a double-digit pace in the US, Europe and the Middle East.

By product category at constant FX (retail): Leather goods (-10%) presented different trends among brands: the poor performance of Prada in Asia Pacific was offset by Miu Miu, which shows signs of resilience in Asia Pacific . The footwear category was the best performer (up 19% at constant FX) with double-digit performances across regions and brands.

Q1 EBIT plummeted to EUR91m (vs HSBC EUR150m), a 42% y-o-y decrease. The 910bp EBIT margin deterioration to 11% was driven by (i) a 150bp GM decline as a positive FX impact was more than offset by unfavourable product and geographic mix; and (ii) a 760bp increase in the SG&A ratio as cost containment measures are not yet bearing fruit and marketing events were concentrated in Q1 2015.

It is worth noting that the unfavourable geographic mix resulted in a higher tax rate (up 480bp to 33.2%).

Issues may continue

We see three negative elements continuing to weigh on the Prada group over the next few months:

- ▶ Geographic mix: we see limited reasons for Greater China to rebound in the short term with Japan and Europe attracting more Chinese tourists. Hong Kong and Macau metrics could suffer from recent or upcoming big openings at Prada at a time when footfall is very low (eg Times Square 1,320m2 flagship in Hong Kong, The Promenade at Galaxy in Macau).
- The product mix (strong footwear, weak handbags and accessories) could well carry on. The Prada brand is trying to have a more balanced product offering, notably by bringing more innovation in the EUR1,000-2,000 price segment for which management acknowledged innovation had been lacking. But this could take more than one or two quarters.
- There has been a stark contrast between the Prada brand (-7% organic sales decline, impacted by the weakness in Greater China and the tough basis of comparison in Japan) and Miu Miu (+5% organic sales growth, with double-digit growth in the US, Europe and the Middle East). Looking at issues of ubiquity and the underpenetrated nature of Miu Miu, we believe this brand will continue to perform better than the core Prada one.

Reasons not to sell

Beware the second derivative

Q2 and beyond should sequentially do better than Q1: management commented that retail growth including new stores was so far flat in Q2 compared to -5% in Q1. There are factors that could support the stock and notably the second derivative of growth, ie momentum, things getting better or at least not getting worse. Note that we expect most luxury players to show a sequential acceleration in the top line in Q2 as the basis of comparison in Japan gets easier and what we call the "zero sum game" (ie Chinese consumption lost in Hong Kong being recouped at other destinations) becomes more visible. This is the reason we had become optimistic on the stock a bit prematurely earlier in the year. We believe that Q3 last year (ended October 2014) was probably the low in terms of same store sales growth.

Expectations still need to come down but sentiment cannot

Prada is the least liked stock in our luxury coverage on the sell-side and the most shorted in the market with very few holders (two institutions hold about 60% of the free float). So whilst the results have been much worse than expected, we doubt the sentiment can become much more negative from here.

Earnings, valuation and risks

Why we are cutting estimates so much

Although sales in Q1 were relatively in line with our estimates, we have cut our assessment for sales over the full year by 5% as the guidance for wholesale sales is weaker than we had anticipated (mid-single digit decline in reported terms) and also we are now taking into account a less favourable FX situation (EUR/USD at 1.14 vs 1.07 last time we published). We see same store sales growth being down 2% over the FY (vs up 1% previously and the current guidance of management at flat). At the margin level, we see reasons for the gross margin to stabilise (FX, retail outperforming wholesale, a few price increases) but see steep operating de-leverage at the SG&A level, implying a 260bps EBIT margin deterioration to 17.2%. As the regional mix is more skewed to high tax geographies, we have also increased the tax rate. All in, we are lowering our FY Jan 16 EPS estimate by 24%.

Source: HSBC estimates, Bloomberg consensus

Why our target price cut is more subtle

As the shares are listed in HKD, the EUR to HKD translation with a EUR/USD going from 1.07 to 1.14 actually increases by 6.5% all things being equal. Rolling over our DCF by one year adds another c8%. As a result, despite cutting our estimates by a low 20%s CAGR, we cut our target price by close to 10% from HKD48 to HKD43. Please see the table on page 2 showing our DCF assumptions. Our target price of HKD43 implies upside of 14%. Therefore we reiterate our Hold rating.

Risks

Key downside risks include a further deterioration of a less successful than expected performance of handbags at Prada this year, important re-investments as more limited barriers to entry make the cost of growth higher in the soft luxury sector as well as pressure to lower prices in Asia. Key upside risks include better-than-expected same store sales growth implying better operating leverage at the group level, a more efficient than expected cost control programme and the group opening fewer stores and/or renegotiating rents on the existing base more efficiently.

Analyst Certification

The following analyst(s), economist(s), and/or strategist(s) who is(are) primarily responsible for this report, certifies(y) that the opinion(s) on the subject security(ies) or issuer(s) and/or any other views or forecasts expressed herein accurately reflect their personal view(s) and that no part of their compensation was, is or will be directly or indirectly related to the specific recommendation(s) or views contained in this research report: Erwan Rambourg, Antoine Belge and Anne-Laure Jamain

Important disclosures

Equities: Stock ratings and basis for financial analysis

HSBC believes an investor's decision to buy or sell a stock should depend on individual circumstances such as the investor's existing holdings, risk tolerance and other considerations and that investors utilise various disciplines and investment horizons when making investment decisions. Ratings should not be used or relied on in isolation as investment advice. Different securities firms use a variety of ratings terms as well as different rating systems to describe their recommendations and therefore investors should carefully read the definitions of the ratings used in each research report. Further, investors should carefully read the entire research report and not infer its contents from the rating because research reports contain more complete information concerning the analysts' views and the basis for the rating.

From 23rd March 2015 HSBC has assigned ratings on the following basis:

The target price is based on the analyst's assessment of the stock's actual current value, although we expect it to take six to 12 months for the market price to reflect this. When the target price is more than 20% above the current share price, the stock will be classified as a Buy; when it is between 5% and 20% above the current share price, the stock may be classified as a Buy or a Hold; when it is between 5% below and 5% above the current share price, the stock will be classified as a Hold; when it is between 5% and 20% below the current share price, the stock may be classified as a Hold or a Reduce; and when it is more than 20% below the current share price, the stock will be classified as a Reduce.

Our ratings are re-calibrated against these bands at the time of any 'material change' (initiation or resumption of coverage, change in target price or estimates).

Upside/Downside is the percentage difference between the target price and the share price.

Prior to this date, HSBC's rating structure was applied on the following basis:

For each stock we set a required rate of return calculated from the cost of equity for that stock's domestic or, as appropriate, regional market established by our strategy team. The target price for a stock represented the value the analyst expected the stock to reach over our performance horizon. The performance horizon was 12 months. For a stock to be classified as Overweight, the potential return, which equals the percentage difference between the current share price and the target price, including the forecast dividend yield when indicated, had to exceed the required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). For a stock to be classified as Underweight, the stock was expected to underperform its required return by at least 5 percentage points over the succeeding 12 months (or 10 percentage points for a stock classified as Volatile*). Stocks between these bands were classified as Neutral.

*A stock was classified as volatile if its historical volatility had exceeded 40%, if the stock had been listed for less than 12 months (unless it was in an industry or sector where volatility is low) or if the analyst expected significant volatility. However, stocks which we did not consider volatile may in fact also have behaved in such a way. Historical volatility was defined as the past month's average of the daily 365-day moving average volatilities. In order to avoid misleadingly frequent changes in rating, however, volatility had to move 2.5 percentage points past the 40% benchmark in either direction for a stock's status to change.

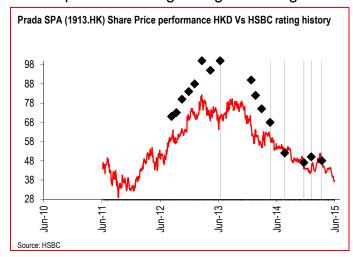

Rating distribution for long-term investment opportunities

As of 22 June 2015, the distribution of all ratings published is as follows:

Buy	40%	(29% of these provided with Investment Banking Services)
Hold	43%	(28% of these provided with Investment Banking Services)
Sell	17%	(21% of these provided with Investment Banking Services)

For the purposes of the distribution above the following mapping structure is used during the transition from the previous to current rating models: under our previous model, Overweight = Buy, Neutral = Hold and Underweight = Sell; under our current model Buy = Buy, Hold = Hold and Reduce = Sell. For rating definitions under both models, please see "Stock ratings and basis for financial analysis" above.

HSBC & Analyst disclosures

None of the below disclosures applies to any of the stocks featured in this report.

- 1 HSBC has managed or co-managed a public offering of securities for this company within the past 12 months.
- 2 HSBC expects to receive or intends to seek compensation for investment banking services from this company in the next 3 months.
- 3 At the time of publication of this report, HSBC Securities (USA) Inc. is a Market Maker in securities issued by this company.
- 4 As of 31 May 2015 HSBC beneficially owned 1% or more of a class of common equity securities of this company.
- As of 30 April 2015, this company was a client of HSBC or had during the preceding 12 month period been a client of and/or paid compensation to HSBC in respect of investment banking services.
- As of 30 April 2015, this company was a client of HSBC or had during the preceding 12 month period been a client of and/or paid compensation to HSBC in respect of non-investment banking securities-related services.
- As of 30 April 2015, this company was a client of HSBC or had during the preceding 12 month period been a client of and/or paid compensation to HSBC in respect of non-securities services.
- 8 A covering analyst/s has received compensation from this company in the past 12 months.
- 9 A covering analyst/s or a member of his/her household has a financial interest in the securities of this company, as detailed below.
- 10 A covering analyst/s or a member of his/her household is an officer, director or supervisory board member of this company, as detailed below.
- 11 At the time of publication of this report, HSBC is a non-US Market Maker in securities issued by this company and/or in securities in respect of this company

HSBC and its affiliates will from time to time sell to and buy from customers the securities/instruments (including derivatives) of companies covered in HSBC Research on a principal or agency basis.

Analysts, economists, and strategists are paid in part by reference to the profitability of HSBC which includes investment banking revenues.

Whether, or in what time frame, an update of this analysis will be published is not determined in advance.

For disclosures in respect of any company mentioned in this report, please see the most recently published report on that company available at www.hsbcnet.com/research.

Additional disclosures

- 1 This report is dated as at 23 June 2015.
- 2 All market data included in this report are dated as at close 19 June 2015, unless otherwise indicated in the report.
- 3 HSBC has procedures in place to identify and manage any potential conflicts of interest that arise in connection with its Research business. HSBC's analysts and its other staff who are involved in the preparation and dissemination of Research operate and have a management reporting line independent of HSBC's Investment Banking business. Information Barrier procedures are in place between the Investment Banking and Research businesses to ensure that any confidential and/or price sensitive information is handled in an appropriate manner.

This document has been issued by The Hongkong and Shanghai Banking Corporation Limited ("HSBC") in the conduct of its Hong Kong regulated business for the information of its institutional and professional investor (as defined by Securities and Future Ordinance (Chapter 571)) customers; it is not intended for and should not be distributed to retail customers in Hong Kong. The Hongkong and Shanghai Banking Corporation Limited is regulated by the Hong Kong Monetary Authority. All enquires by recipients in Hong Kong must be directed to your HSBC contact in Hong Kong. If it is received by a customer of an affiliate of HSBC, its provision to the recipient is subject to the terms of business in place between the recipient and such affiliate. This document is not and should not be construed as an offer to sell or the solicitation of an offer to purchase or subscribe for any investment. HSBC has based this document on information obtained from sources it believes to be reliable but which it has not independently verified; HSBC makes no guarantee, representation or warranty and accepts no responsibility or liability as to its accuracy or completeness. Expressions of opinion are those of the Research Division of HSBC only and are subject to change without notice. HSBC and its affiliates and/or their officers, directors and employees may have positions in any securities mentioned in this document (or in any related investment) and may from time to time add to or dispose of any such securities (or investment). HSBC and its affiliates may act as market maker or have assumed an underwriting commitment in the securities of companies discussed in this document (or in related investments), may sell them to or buy them from customers on a principal basis and may also perform or seek to perform investment banking or underwriting services for or relating to those companies.

HSBC Securities (USA) Inc. accepts responsibility for the content of this research report prepared by its non-US foreign affiliate. All U.S. persons receiving and/or accessing this report and wishing to effect transactions in any security discussed herein should do so with HSBC Securities (USA) Inc. in the United States and not with its non-US foreign affiliate, the issuer of this report.

In the UK this report may only be distributed to persons of a kind described in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005. The protections afforded by the UK regulatory regime are available only to those dealing with a representative of HSBC Bank plc in the UK. In Singapore, this publication is distributed by The Hongkong and Shanghai Banking Corporation Limited, Singapore Branch for the general information of institutional investors or other persons specified in Sections 274 and 304 of the Securities and Futures Act (Chapter 289) ("SFA") and accredited investors and other persons in accordance with the conditions specified in Sections 275 and 305 of the SFA. This publication is not a prospectus as defined in the SFA. It may not be further distributed in whole or in part for any purpose. The Hongkong and Shanghai Banking Corporation Limited Singapore Branch is regulated by the Monetary Authority of Singapore. Recipients in Singapore should contact a "Hongkong and Shanghai Banking Corporation Limited, Singapore Branch" representative in respect of any matters arising from, or in connection with this report. In Australia, this publication has been distributed by The Hongkong and Shanghai Banking Corporation Limited (ABN 65 117 925 970, AFSL 301737) for the general information of its "wholesale" customers (as defined in the Corporations Act 2001). Where distributed to retail customers, this research is distributed by HSBC Bank Australia Limited (AFSL No. 232595). These respective entities make no representations that the products or services mentioned in this document are available to persons in Australia or are necessarily suitable for any particular person or appropriate in accordance with local law. No consideration has been given to the particular investment objectives, financial situation or particular needs of any recipient. This publication is distributed in New Zealand by The Hongkong and Shanghai Banking Corporation Limited, New Zealand Branch incorporat

In Japan, this publication has been distributed by HSBC Securities (Japan) Limited. It may not be further distributed in whole or in part for any purpose. In Korea, this publication is distributed by The Hongkong and Shanghai Banking Corporation Limited, Seoul Securities Branch ("HBAP SLS") for the general information of professional investors specified in Article 9 of the Financial Investment Services and Capital Markets Act ("FSCMA"). This publication is not a prospectus as defined in the FSCMA. It may not be further distributed in whole or in part for any purpose. HBAP SLS is regulated by the Financial Services Commission and the Financial Supervisory Service of Korea.

In Canada, this document has been distributed by HSBC Bank Canada and/or its affiliates. Where this document contains market updates/overviews, or similar materials (collectively deemed "Commentary" in Canada although other affiliate jurisdictions may term "Commentary" as either "macro-research" or "research"), the Commentary is not an offer to sell, or a solicitation of an offer to sell or subscribe for, any financial product or instrument (including, without limitation, any currencies, securities, commodities or other financial instruments).
