公司/行业动态

金斯瑞生物科技 [1548.HK, 7.15港元, 未评级] - CAR-T会否带来额外60%的增长

分析员: 何霜霖 (harryhe@chinastock.com.hk; 电话: (852) 3698 6320;

王志文, CFA (cmwong@chinastock.com.hk; 电话: (852) 3689 6317);

金斯瑞生物科技现有的CRO业务（占总收入超过80%）有望在2017年和2018年实现稳定的高双位数增长。随着FDA在2017年8月31日批准诺华公司的CAR-T（嵌合抗原受体T细胞疗法）药物Kymriah, CAR-T成为了市场焦点。金斯瑞作为领先的CAR-T临床研究公司（中国的其他CAR-T项目仍处于非常早期或未成熟阶段），其股价大幅飙升。我们认为公司的CAR-T治疗多发性骨髓瘤的潜力尚未完全反映。考虑到股价从高位下跌了25%，相信现在是重新关注该股份的好时机。根据彭博共识预测，公司的2017/18年市盈率为59/46倍。这估值仍远低于直接可比的CRO公司药明生物（2269.hk）（根据彭博共识预测，2017/18年市盈率为116/68倍）。

公司背景: 金斯瑞生物科技（金斯瑞）成立于2002年，是一家生命科学研究与应用服务及产品供货商，业务覆盖全球多个国家。在17年上半年，公司的收入有约83.6%来自生命科学研究服务（即是CRO，以合约方式向生物技术和医疗器械公司提供外包研究服务的组织）。其余5.5%、3.5%和7.4%的收入分别来自生命科学研究目录产品、临床前药物研发服务和工业合成生物产品。该公司于2015年在港交所上市。

明星药物CAR-T: 2017年8月27日，吉利德科学公司斥资119亿美元收购Kite以取得旗下的CAR-T，预计这是继诺华公司的KYMRIAH（于17年8月31日获批）后第二个获得FDA批准的CAR-T。诺华公司的KYMRIAH用于B细胞急性淋巴细胞白血病（ALL），而金斯瑞的CAR-T则用于多发性骨髓瘤。

金斯瑞的CAR-T较竞争对手拥有优势: 金斯瑞的CAR-T结构涉及双链抗体靶点，对比竞争对手为单链靶点。金斯瑞已完全开发并拥有双链抗体靶点的专利，目前没有竞争对手拥有这技术知识。双链抗体靶点比单链靶点更能捕捉癌细胞。

金斯瑞的CAR-T研发和推出时间表: 目前公司的CAR-T临床研究（留意它们不是临床试验，因为公司尚未向CFDA提交资料，而在我国，CAR-T相关政策尚未出台）。目前，该公司的临床研究涉及70名患者，管理层预计将扩大到100名患者。根据我们的理解，我们认为约100名患者的数据仍远远不够（特别是未来的III期临床试验）。然而，在正面的发展方面，管理层的目标是2017年底前在美国提交IND申请，并预计在2018年第一季取得临床试验批准。如果进展顺利，我们预计公司需要2年完成美国临床试验，并在约2020年推出。

金斯瑞的CAR-T销售前景: 诺华的KYMRIAH价格为475,000美元，用于B细胞ALL。金斯瑞的CAR-T用于多发性骨髓瘤。多发性骨髓瘤在中国和美国的发病率约为~3-5 / 100,000人，即是中国和美国每年约有20,000 / 20,000名患者。由于预计多发性骨髓瘤患者的寿命约5年，中国和美国多

市值: 15.79亿美元; 自由流通量: 40.18%

	2015A	2016A	2017E	2018E	2019E

来源: 彭博

发性骨髓瘤的市场总规模可能达到20万人。如果金斯瑞将其CAR-T价格设于50万元人民币（约诺华KYMRIAH的1/6），再假设公司的价格优势使其取得5%市场份额（即医治约10,000名患者），则有可能产生约50亿元人民币的总收入。假设利润率为30%，有望在2022年前后为公司产生约15亿元人民币的利润，如果假设贴现率为10%，那么为2018年带来的利润现值为10亿元人民币。如果假设CAR-T的2018年市盈率为20倍，则金斯瑞的CAR-T的价值约为每股11.6港元，相当于60%的额外上升空间。

估值: 根据彭博共识预测，公司的2017/18年市盈率为59/46倍。这估值仍远低于直接可比的CRO公司药明生物（2269.hk）（根据彭博共识预测，2017/18年市盈率为116/68倍）。此外，考虑到公司CAR-T的潜力，再加上股价较高位回落超过25%，我们认为现时或是一个不错的进场时机。

催化剂: 有关于CAR-T项目的消息。

风险: 研发过程慢于预期；在多发性骨髓瘤的CAR-T项目方面，公司或面对国际大型企业的竞争（如Kite和Bluebird）。

COMPANY / INDUSTRY NEWS

Genscript Biotech Corporation [1548.HK, HK\$7.15, NOT RATED] – Another 60% upside from CAR-T?

Analyst: Harry He (harryhe@chinastock.com.hk; Tel: (852) 3698 6320;

Wong Chi Man, CFA (cmwong@chinastock.com.hk; Tel: (852) 3689 6317);

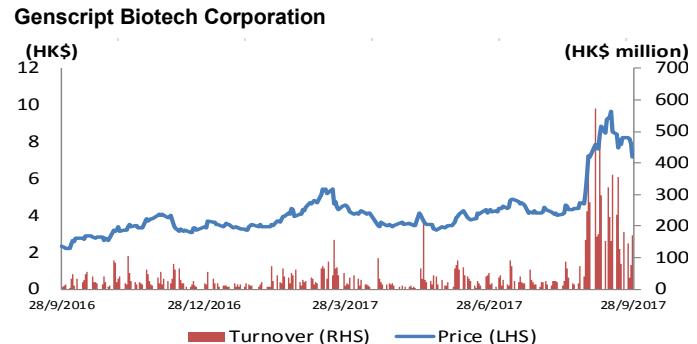

Genescript Biotech's (GS) existing CRO business (>80% revenue contribution) is expected to deliver stable high-tear growth in 2017 and 2018. With the FDA's recent approval on Novartis' KYMRIAH CAR-T (Chimeric Antigen Receptor T-cell immune therapy, 嵌合抗原受體T細胞療法) on Aug 31, 2017, CAR-T has become a market star. As a leading CAR-T clinical study Company (other CAR-T projects in China are at a very early/immature stage, Figures 1-6), its share price has surged sharply. We believe GS's CAR-T potential to cure Multiple myeloma (多發性骨髓瘤, MM) has not yet been fully revealed. With its share price down 25% from its peak, we believe it is good time to revisit the stock.

Background: Established in 2002, GS is a life sciences research and application service and product provider with comprehensive global portfolio coverage. In 1H2017, GS generated approximately 83.6% of its total revenue from life sciences research services (i.e. essentially CRO, which is an organization that provides support to pharmaceutical, biotechnology, and medical device companies in the form of outsourced research services on a contract basis). The remaining 5.5%, 3.5%, and 7.4% of its total revenue comes from life sciences research catalog products, preclinical drug development services, and industrial synthetic biology products, respectively. The Company was listed on the HKEx in 2015.

CAR-T, a market star: On August 27, 2017, Gilead Sciences paid US\$11.9bn to acquire Kite for its CAR-T, which is expected to be the second FDA-approved CAR-T after Novartis' KYMRIAH (approved on Aug 31, 2017). Novartis KYMRIAH is used for *B-cell Acute lymphoblastic leukemia* (B細胞急性淋巴細胞白血病, ALL), while GS's CAR-T is indicated for MM.

GS's CAR-T advantages over its competitors: The structure of GS's CAR-T involves two light-chain antibody targeting (雙鏈抗體靶點) vs. single targeting for its competitors (單鏈靶點). GS fully developed and owns the double antibody targeting patent, and currently no competitors have this technology know-how. Double chain antibody targeting is more efficient than single for capturing cancer cells.

GS's CAR-T R&D and launch schedule: Currently GS's CAR-T clinical studies (note that they are not clinical trials, as it has not submitted data to the CFDA yet, and in China, CAR-T-related policies have not yet been published). Currently, GS's clinical studies include 70 patients, and management expects to expand this to 100 patients. Based on our understanding, we think ~100 patients are far from enough (especially for the future Phase III clinical trial). However, one positive development is that management aims to file its IND application in the U.S. by end-2017 and expects to get clinical trial approval in Q1 2018. If things go smoothly, we expect it to take ~2 years to complete the U.S. clinical trials, followed by a launch in ~2020.

Market Cap: US\$1579m; Free Float: 40.18%

Source: Bloomberg

GS's CAR-T sales outlook: Novartis' KYMRIAH price is US\$475,000, indicated for B-cell ALL. GS's CAR-T is indicated for MM. MM's incidence rate is ~3-5/100,000 in China and the U.S., i.e. ~20,000/20,000 patients each year in China and the U.S. With the expected life span of MM patients of ~5 years, the total market size of MM in China and U.S could be ~200,000 patients. If GS prices its CAR-T at RMB500,000 (or ~1/6 of Novartis' KYMRIAH), and if we assume it achieves a 5% market share due to its price advantage (i.e. treating ~10,000 patients), it could generate total revenue of about RMB5bn. Assuming a 30% profit margin, this would generate profit of about RMB1.5bn in ~2022, or ~RMB1bn in 2018 in terms of present value if we use a discount rate of 10%. If we give CAR-T a 20x PER for 2018, GS's CAR-T is worth ~HK\$11.6/share, i.e. another 60% upside.

Valuation: The Company is trading at 59/46x 2017/18E Bloomberg consensus PER (total two estimates). This valuation is still much lower than its direct comparable CRO company Wuxi Bio (2269.hk) (68x 2018E PER). Also, given its CAR-T potential, we believe the current share price level after a >25% correction from its peak may be a good entry point.

Catalysts: News flow on CAR-T.

Risk: Slower-than-expected R&D progress, competition from some major international players with CAR-T projects indicated for MM, such as Kite and Bluebird.

S1	EpCAM CAR-T for Treatment of Nasopharyngeal Carcinoma and Breast Cancer	Recruiting	No Results Available	• Malignant Neoplasm of Nasopharynx TNM Staging Distant Metastasis (M) • Breast Cancer Recurrent	• Biological: CAR-T cells recognizing EpCAM	*West China Hospital, Sichuan University, Chengdu, Sichuan, China
S2	Combination Transfer of #CD19-TCRz41BB and #CD22-TCRz41BB CAR-T Cells for B-cell Hematologic Malignancy	Recruiting	No Results Available	• Hematopoietic/Lymphoid Cancer	• Biological: Mixed CAR-T Transfer	*Xuzhou Medical University, XuZhou, Jiangsu, China
S3	CAR-T Therapy for Central Nervous System B-cell Acute Lymphocytic Leukemia	Recruiting	No Results Available	• B-cell Acute Lymphocytic Leukemia	• Biological: CD19 CAR-T cells	*The First Affiliated Hospital of Soochow University, Suzhou, China
S4	CD19-CART Treatment for ALL	Active, not recruiting	No Results Available	• Acute Leukemia	• Biological: CD19 CART	*Shanghai Biory Inc., Shanghai, Shanghai, China
S5	Anti-CD22 CAR-T Cell Therapy Targeting B Cell Malignancies	Active, not recruiting	No Results Available	• Leukemia • Lymphoma	• Biological: Anti-CD22-CAR-transduced T cells	*Fengtai District, Beijing, Beijing, China
S6	CD19-Janssen 3rd Generation CAR-T Cells for Refractory B Cell Malignancy - a Phase I/IIa Trial	Active, not recruiting	No Results Available	• B Cell Lymphoma • B Cell Leukemia	• Biological: Autologous 3rd generation CD19-targeting CAR T cells	*Uppsala University Hospital, Dept of Oncology, Uppsala, Sweden
S7	A Study of CD19 Redirected Autologous T Cells for CD19 Positive Systemic Lupus Erythematosus (SLE)	Recruiting	No Results Available	• Systemic Lupus Erythematosus (SLE)	• Drug: cyclophosphamide • Drug: anti-CD19-CAR-T cells	*Shanghai Jiaotong University School of Medicine, Renji Hospital, Shanghai, China
S8	A Study of GPC3-targeted T Cells by Intra-tumor Injection for Advanced HCC (GPC3-CART)	Recruiting	No Results Available	• Carcinoma, Hepatocellular	• Drug: GPC3-CART cells	*302 Military Hospital, Beijing, China
S9	CART-19 Cells For MRD Positive CD19+ ALL	Recruiting	No Results Available	• Acute Lymphoblastic Leukemia	• Biological: CART-19	*Fujian Medical University Union Hospital, Fuzhou, Fujian, China
S10	Treatment of Relapsed and/or Chemotherapy Refractory CD33 Positive Acute Myeloid Leukemia by CART-33	Recruiting	No Results Available	• Relapsed Adult Myeloid Leukemia • Chemotherapy Refractory Adult Myeloid Leukemia	• Biological: CART33 cells • Biological: anti-CD33 CART • Biological: anti-CD33 CAR T cells	*Biotherapeutic Department and Pediatrics Department of Chinese PLA General Hospital, Hematological Department, Affiliated Hospital of Changzheng Medical College, Beijing, Beijing, China
S11	A Study to Assess CD19-Targeted Immunotherapy T Cells in Patients With Relapsed or Refractory CD19+ B-Cell Leukemia	Recruiting	No Results Available	• Leukemia, B-Cell	• Drug: anti-CD19-CAR-T cells	*Shanghai Changzheng Hospital/The Second Military Medical University, Shanghai, Shanghai, China
S12	A Study of MG7 Redirected Autologous T Cells for Advanced MG7 Positive Liver Metastases(MG7-CART)	Recruiting	No Results Available	• Liver Metastases	• Biological: MG7-CART	*Xijing Hospital of Digestive Diseases, Xian, Shaanxi, China
S13	CD19 CAR T Cells in Patients With Resistant or Refractory CD19+ Acute Lymphoblastic Leukemia	Recruiting	No Results Available	• Acute Lymphoblastic Leukemia, Adult B-Cell • Acute Lymphoblastic Leukaemia Recurrent	• Biological: CD19 CAR T cells	*Institute of Hematology & Blood Diseases Hospital, Tianjin, China
S14	Humanized CD19 CAR-T Cells With CRS Suppression Technology for nr-CD19+ Acute Lymphoblastic Leukemia	Not yet recruiting	No Results Available	• Acute Lymphoblastic Leukemia • CD19 Positive • Relapse • Refractory	• Biological: Humanized CD19 CAR-T cells • Biological: Humanized CD19 CAR-T cells with CRS suppression technology	
S15	EGFR CART Cells for Patients With Metastatic Colorectal Cancer	Recruiting	No Results Available	• EGFR-positive Colorectal Cancer	• Biological: EGFR CART	*The Second People's Hospital of Shenzhen, Shenzhen, Guangdong, China
S16	BCMA/CD38 CAR-T in the Treatment of Multiple Myeloma	Recruiting	No Results Available	• Multiple Myeloma	• Biological: BCMA/CD38 CAR T cells	*Shenzhen Geno-Immune Medical Institute, Shenzhen, Guangdong, China
S17	Early cART and cART in Combination With Autologous HIV-1 Specific Cytotoxic T lymphocyte (CTL) Infusion in The Treatment of Acute HIV-1 Infected Adults	Unknown status	No Results Available	• Acute HIV Infection	• Drug: cART(CTDF/AZT+3TC+LPV/r) • Procedure: CTL Infusion	*Beijing Youan Hospital, Capital Medical University, Beijing, Beijing, China *National Center for STD and AIDS Control and Prevention, Chinese Center for Disease Control and Prevention, Beijing, Beijing, China *The First Affiliated Hospital of Guangxi Medical University, Nanning, Guangxi, China *China Medical University, Chenzhang, Liaoning, China *Department of Infectious Diseases, Tangdu Hospital, The Fourth Military Medical University, Xian, Shaanxi, China *Shandong Center for Disease Control and Prevention, Jinan, Shandong, China *Zhejiang University, Hangzhou, Zhejiang, China

COMPANY / INDUSTRY NEWS

Genscript Biotech Corporation [1548.HK, HK\$7.14, NOT RATED] – Another 60% upside from CAR-T?

Analyst: Harry He (harryhe@chinastock.com.hk; Tel: (852) 3698 6320;

Wong Chi Man, CFA (cmwong@chinastock.com.hk; Tel: (852) 3689 6317);

Figure 5: CAR-T projects in China

68	CAR T Cells for Refractory B Cell Malignancy	Recruiting	No Results Available	*B-Cell Leukemia *B-Cell Lymphoma	*Biological: Autologous CD19-targeting CAR-T cells	*No.2 Hospital of Hebei Medical University, Shijiazhuang, Hebei, China
69	CD30 CAR T Cells, Relapsed CD30 Expressing Lymphoma (RELY-30)	Recruiting	No Results Available	*Hodgkin's Lymphoma *Non-Hodgkin Lymphoma	*Genetic: CAR T Cells *Drug: Cyclophosphamide *Drug: Fludarabine	*Houston Methodist Hospital, Houston, Texas, United States *Texas Children's Hospital, Houston, Texas, United States
70	CD19-directed CAR T Cells Therapy in Relapsed/Refractory B Cell Malignancy	Recruiting	No Results Available	*Leukemia *Lymphoma	*Biological: CD19-directed CAR-T cells	*Shanghai Tongji Hospital, Tongji University School of Medicine, Shanghai, China
71	The Safety and Efficacy of CART-19 Cells in Relapse and Refractory Patients With CD19+ B-Cell Lymphoma	Recruiting	No Results Available	*B Cell Lymphoma	*Drug: Cyclophosphamide *Drug: Fludarabine *Biological: CART-19	*Henan Cancer Hospital, Zhengzhou, Henan, China
72	Safety and Efficacy Evaluation of IM19 CAR-T Cells (IM19CAR-T)	Recruiting	No Results Available	*Leukemia	*Biological: IM19 CAR-T *Drug: fludarabine and cyclophosphamide	*Hebei Yanda Ludaopei Hospital, Beijing, China
73	Evaluate the Safety and Efficacy of CAR-T in the Treatment of Pancreatic Cancer	Recruiting	No Results Available	*Pancreatic Cancer *CAR	*Drug: Chimeric antigen receptor T cell	*Harbin Medical University, Harbin, Heilongjiang, China
74	CAR T Cells Targeting CD30 Positive Lymphomas (4SCAR30273)	Recruiting	No Results Available	*Lymphomas	*Genetic: Anti-CD30 CAR T cells	*University of Florida, Gainesville, Florida, United States *Peking University Cancer Hospital, Beijing, Beijing, China
75	Treatment of Chemotherapy Refractory Multiple Myeloma by CART-138	Recruiting	No Results Available	*Multiple Myeloma	*Biological: CART-138 cells	*Chinese PLA General Hospital, Beijing, Beijing, China
76	Treatment of Chemotherapy Refractory EGFR(Epidermal Growth Factor Receptor)-Positive Advanced Solid Tumors (CART-EGFR)	Recruiting	No Results Available	*Advanced EGFR-positive Solid Tumors	*Biological: CART-EGFR	*Chinese PLA General Hospital, Beijing, Beijing, China
77	Sequential Infusion of Anti-CD19 and Anti-CD20 CAR-T Cells Against Relapsed and Refractory B-cell Lymphoma	Recruiting	No Results Available	*Recurrent or Refractory B Cell Malignancy	*Biological: Mixed CD19/CD20 CAR-T Transfer	*Shanghai Longyao Biotechnology Inc., Ltd., Shanghai, Jiangnan, China
78	Immunotherapy With Bispecific CAR-T Cells for B-Cell Lymphoma, ALL and CLL	Not yet recruiting	No Results Available	*Leukemia *Lymphoma	*Biological: anti-CD19 anti-CD20 Bispecific CAR-T	
79	The Safety and Efficacy of CART-19 Cells in B-cell Acute Lymphoblastic Leukemia (B-ALL)	Recruiting	No Results Available	*B-cell Acute Lymphoblastic Leukemia	*Drug: Cyclophosphamide *Drug: Fludarabine *Biological: CART-19 cells	*Henan Cancer Hospital, Zhengzhou, Henan, China
80	Memory-enriched CAR-T Cells Immunotherapy for B-Cell Lymphoma	Recruiting	No Results Available	*Recurrent Adult Diffuse Large Cell Lymphoma *Recurrent Follicular Lymphoma *Recurrent Mantle Cell Lymphoma *Stage III Adult Diffuse Large Cell Lymphoma *Stage III Follicular Lymphoma *Stage III Mantle Cell Lymphoma *Stage IV Adult Diffuse Large Cell Lymphoma *Stage IV Follicular Lymphoma *Stage IV Mantle Cell Lymphoma	*Drug: CD19-CAR-T cells	*Department of Oncology, Chongqing, Chongqing, China
81	Evaluation of 4th Generation Safety-designed CAR T Cells Targeting High-risk and Refractory B-Cell Lymphomas	Recruiting	No Results Available	*B-cell Lymphomas	*Genetic: Anti-CD19 CAR T cells	*Peking University Cancer Hospital, Beijing, Beijing, China
82	CD19-targeting, 3rd Generation CAR T Cells for Refractory B Cells Malignancy	Not yet recruiting	No Results Available	*B-Cell Leukemia *B-Cell Lymphoma	*Biological: CAR T cells	*Uppsala University Hospital, Dept of Oncology, Uppsala, Sweden
83	CD19 CAR T Cells for Patients With Relapse and Refractory CD19+ B-cell Lymphoma	Recruiting	No Results Available	*B Cell Lymphoma	*Drug: Fludarabine *Drug: Cyclophosphamide *Biological: CD19 CART	*The Second People's Hospital of Shenzhen, Shenzhen, Guangdong, China
84	Pilot Study of T-APCs Following CAR-T Cell Immunotherapy for CD19+ Leukemia	Recruiting	No Results Available	*CD 19+ Acute Leukemia	*Biological: T-cell Antigen Presenting Cells expressing truncated CD19 (T-APC)	*Seattle Children's Hospital, Seattle, Washington, United States
85	CAR T Cells in Treating Patients With Malignant Gliomas Overexpressing EGFR	Unknown status	No Results Available	*Advanced Glioma	*Biological: anti-EGFR CAR T	*Shanghai Cancer Institute, Xuhui, Shanghai, China

Figure 6: CAR-T projects in China

86	CAR-T in the Treatment of AML	Recruiting	No Results Available	*Acute Myeloid Leukemia •Biological: Mucl1/CD33/CD38/CD56/CD117/CD123-specific gene-engineered T cells	•Shenzhen Geno-Immune Medical Institute, Shenzhen, Guangdong, China
87	Efficacy of CART-19 Cell Therapy in B Cell Acute Lymphoblastic Leukemia	Recruiting	No Results Available	*Acute Lymphoblastic Leukemia •Biological: CART-19	•First Affiliated Hospital of Henan University of Science and Technology, Luoyang, Henan, China
88	Combination CAR-T Cell Therapy Targeting Hematological Malignancies	Recruiting	No Results Available	*B-cell Malignancies •Biological: 40CAR19 and 40CAR22 •Biological: 40CAR19 and 40CAR38 •Biological: 40CAR19 and 40CAR20 •Biological: 40CAR19 and 40CAR123	•Shenzhen Geno-Immune Medical Institute, Shenzhen, Guangdong, China
89	CAR-T-meso Long-term Follow-up	Active, not recruiting	No Results Available	*Subjects Who Have Received Lenalidomide-based CART-meso Therapy •Biological: lenalidomide-based CART meso therapy	•Abramson Cancer Center of the University of Pennsylvania, Philadelphia, Pennsylvania, United States
90	PD-1 Antibody Expressing CAR T Cells for Mesothelin Positive Advanced Malignancies	Recruiting	No Results Available	*Solid Tumor, Adult •Advanced Cancer •Biological: PD-1 antibody expressing mesothelin specific CAR-T cells	•Ningbo No.5 Hospital (Ningbo Cancer Hospital), Ningbo, Zhejiang, China
91	Immunotherapy for High Risk/Relapsed CD19+ Acute Lymphoblastic Leukaemia Using CAR T-cells to Target CD19	Not yet recruiting	No Results Available	*Leukemia, Lymphoblastic, Acute •Biological: CD19CAT-41BBZ CAR T-cells	
92	Autologous CD19 CAR T Cells in Relapsed or Refractory B-cell Lymphoma	Recruiting	No Results Available	*B-cell Lymphoma •Biological: autologous anti-CD19 CAR T cells	•Peking University Cancer Hospital, Beijing, China
93	A Cancer Research UK Trial of Anti-GD2 T-cells (1RG-CART)	Recruiting	No Results Available	*Relapsed or Refractory Neuroblastoma •Genetic: 1RG-CART/m12 (Dose Level 1) •Genetic: 1RG-CART/m12 (Dose Level 2) •Genetic: 1RG-CART/m12 (Dose Level 3) •Genetic: 1RG-CART/m12 (Dose Level 4) •Drug: Cyclophosphamide •Drug: Fludarabine •Genetic: 1RG-CART/m12 (Dose Level 5)	•University College London (UCL), London, United Kingdom •Great Ormond Street Hospital for Children NHS Foundation Trust (GOSH), London, United Kingdom
94	A Study of Chimeric Antigen Receptor T Cells Combined With Interventional Therapy in Advanced Liver Malignancy	Recruiting	No Results Available	*Carcinoma, Hepatocellular •Pancreatic Cancer Metastatic •Colorectal Cancer Metastatic •Drug: CAR-T cell	•Shanghai Tumor Hospital, Shanghai, China
95	Chimeric Antigen Receptor T Cells (CAR-T) Therapy in Refractory/Relapsed B-Cell Hematologic Malignancies	Recruiting	No Results Available	*Leukemia, B-Cell •Lymphoma, B-Cell •Biological: CD19CART	•Innovative Cellular Therapeutics Co., LTD., Shanghai, China
96	Chimeric Antigen Receptor-Modified T Cells for Breast Cancer	Completed	No Results Available	*Breast Cancer •Biological: HER-2-targeting CAR T Cells infusion	•Central Laboratory in Fuda cancer hospital, Guangzhou, Guangdong, China
97	CTLA-4 and PD-1 Antibodies Expressing Mesothelin-CAR-T Cells for Mesothelin Positive Advanced Solid Tumor	Recruiting	No Results Available	*Advanced Solid Tumor •Biological: CTLA-4/PD-1 antibodies expressing mesothelin-CAR-T	•Ningbo No.5 Hospital (Ningbo Cancer Hospital), Ningbo, Zhejiang, China
98	CAR-T Cell Immunotherapy in CD19 Positive Relapsed or Refractory Leukemia and Lymphoma	Recruiting	No Results Available	*Acute Lymphocytic Leukemia •Chronic Lymphocytic Leukemia •Follicular Lymphoma •Mantle Cell Lymphoma •B-cell Prolymphocytic Leukemia •Diffuse Large Cell Lymphoma •Biological: PCAR-019 (anti-CD19 CAR-T cells)	•PersonGen BioTherapeutics (Suzhou) Co., Ltd., Suzhou, Jiangsu, China
99	Anti-mesothelin CAR T Cells for Patients With Recurrent or Metastatic Malignant Tumors	Recruiting	No Results Available	*Mesothelin Positive Tumors •Biological: anti-mesothelin CAR T cells	•China Melan General Hospital, Beijing, China
100	Pilot Study of Autologous Anti-EGFRvIII CAR T Cells in Recurrent Glioblastoma Multiforme	Recruiting	No Results Available	*Glioblastoma Multiforme •Biological: anti-EGFRvIII CAR T cells •Drug: cyclophosphamide •Drug: Fludarabine	•Sanbo Brain Hospital Capital Medical University, Beijing, China

免责声明

此研究报告并非针对或意图被居于或位于某些司法管辖范围之任何人士或市民或实体作派发或使用，而在该等司法管辖范围内分发、发布、提供或使用将会违反当地适用的法律或条例或会导致中国银河国际证券(香港)有限公司(“银河国际证券”)及/或其集团成员需在该司法管辖范围内作出注册或领照之要求。

银河国际证券(中国银河国际金融控股有限公司附属公司之一)发行此报告(包括任何附载资料)予机构客户，并相信其资料来源都是可靠的，但不会对其准确性、正确性或完整性作出(明示或默示)陈述或保证。

此报告不应被视为是一种报价、邀请或邀约购入或出售任何文中引述之证券。过往的表现不应被视为对未来的表现的一种指示或保证，及没有陈述或保证，明示或默示，是为针对未来的表现而作出的。收取此报告之人士应明白及了解其投资目的及相关风险，投资前应咨询其独立的财务顾问。

报告中任何部份之资料、意见、预测只反映负责预备本报告的分析员的个人意见及观点，该观点及意见未必与中国银河国际金融控股有限公司及其附属公司(“中国银河国际”)、董事、行政人员、代理及雇员(“相关人士”)之投资决定相符。

报告中全部的意见和预测均为分析员在报告发表时的判断，日后如有改变，恕不另行通告。中国银河国际及/或相关伙伴特此声明不会就因为本报告及其附件之不准确、不正确及不完整或遗漏负上直接或间接上所产生的任何责任。因此，读者在阅读本报告时，应连同此声明一并考虑，并必须小心留意此声明内容。

利益披露

中国银河证券(6881.HK; 601881.CH)乃中国银河国际及其附属公司之直接或间接控股公司。

中国银河国际可能持有目标公司的财务权益，而本报告所评论的是涉及该目标公司的证券，且该等权益的合计总额相等于或高于该目标公司的市场资本值的1%；

一位或多位于中国银河国际的董事、行政人员及/或雇员可能是目标公司的董事或高级人员。

中国银河国际及其相关伙伴可能，在法律许可的情况下，不时参与或投资在本报告里提及的证券的金融交易，为该等公司履行服务或兜揽生意及/或对该等证券或期权或其他相关的投资持有重大的利益或影响交易。

中国银河国际可能曾任本报告提及的任何或全部的机构所公开发售证券的经理人或联席经理人，或现正涉及其发行的主要庄家活动，或在过去12个月内，曾向本报告提及的证券发行人提供有关的投资或一种相关的投资或投资银行服务的重要意见或投资服务。

再者，中国银河国际可能在过去12个月内就投资银行服务收取补偿或受委托和可能现正寻求目标公司投资银行委托。

分析员保证

主要负责撰写本报告的分析员确认 (a) 本报告所表达的意见都准确地反映他或他们对任何和全部目标证券或发行人的个人观点；及 (b) 他或他们过往，现在或将来，直接或间接，所收取之报酬没有任何部份是与他或他们在本报告所表达之特别推荐或观点有关连的。

此外，分析员确认分析员本人及其有联系者(根据香港证监会持牌人操守准则定义)均没有(1) 在研究报告发出前30 日内曾交易报告内所述的股票；(2) 在研究报告发出后3个营业日内交易报告内所述的股票；(3) 担任报告内涵盖的上市公司的行政人员；(4) 持有报告内涵盖的上市公司的财务权益。

评级指标

买入 : 股价于12个月内将上升 >20%

沽出 : 股价于12个月内将下跌 >20%

持有 : 没有催化因素，由“买入”降级直至出现明确“买入”讯息或再度降级为立刻卖出
