## 昂纳科技集团

## 表现优于同业

- 公司公布了首季未经审核营业额数据，反映公司的光网络产品继续呈现不俗的同比增长。除了收入同比增长良好之外，公司在披露信息方面的改善将建立市场对昂纳科技集团的信心。
- 由于公司正受益于韩国和日本在采用 5G 前期阶段的需求，公司的表现优于同业。
- 我们预计，消费电子板块疲弱表现的影响将在未来几个季度逐渐消退，并预计利润率的压力将会缓解。
- 我们认为，公司在 2019 年和 2020 年的营业额增长，将受到与海外和中国推出 5G 相关的光通信产品的需求所支撑。
- 维持「买入」评级，目标价为 5.63 港元，基于 15 倍 2019 年市盈率。

## 2019 年一季度同比增长坚挺

公司昨日公布了 2019 年一季度首季未经审核营业额数据。期内未经审计收入预计为 6.424 亿港元，同比增长 20.1%。根据该公告，收入的增加是由于韩国和日本在采用 5G 前期阶段带来强劲需求推动，其中昂纳科技集团已签订多年战略协议以提供光网络产品，这将有助于公司持续确保其产量。公司 2019 年一季度收入增长仍受到消费电子业务表现疲弱所拖累。据我们理解，2019 年一季度光网络产品的同比增长超过 30%，高于整体收入增长。公司 2019 年一季度的收入增长与我们对全年的预测（20.6%）一致，我们预计电消费电子业务疲弱的影响将逐渐消退。除消费类电子产品外，其他非光学网络产品业务在 2019 年一季度继续表现良好。消费电子板块的疲弱运营表现是 2018 年利润率受压的原因，但我们预计利润率受压的情况将会缓解。

## 表现优于同业

在我们于 2019 年 4 月 11 日发布的最新行业报告中，我们解释指台湾光通信设备分部 2019 年 3 月营业额同比下降的原因是：a) 电信运营商对中国 GPON/FTTH 相关产品的需求放缓；b) 企业正在过渡到 5G 产品。昂纳科技集团在 2019 年一季度表现优于同业，这符合我们的结论，即是昂纳科技集团并非高度依赖中国市场，同时公司将受益于海外市场对 5G 的推广。公司在 2019 年和 2020 年的营业额增长得益于与海外和中国推出 5G 相关的光学产品的坚挺需求。

## 正在建立投资者的信心

展望未来，公司承诺将为投资者提供截至财政年度三个月和九个月的最新营业额情况，藉此提高透明度及加强沟通。我们认为，公司的 2018 年业绩将有助投资者重建对公司的信心，而透明度的提升将进一步提振市场情绪。

## 估值吸引

我们认为股份目前的估值（12.1 倍 2019 年市盈率和 9.8 倍 2020 年市盈率）并不昂贵。我们维持「买入」评级，目标价为 5.63 港元（基于 15 倍 2019 年市盈率）。

## O-Net

### Outperforming its peers

- O-Net reported its first quarterly sales update, which indicates that the Company's optical networking products continue to report resilient YoY growth. Apart from the resilient YoY top-line growth, disclosure improvements will build confidence in O-Net.
- O-Net has outperformed its peers, as the Company is benefiting from demand from early 5G adoption in Korea and Japan.
- We expect the impact of the weak performance of the consumer electronics segment to fade gradually in the coming quarters and expect margin pressure to ease.
- We believe O-Net's turnover growth in 2019 and 2020 will be supported by resilient demand for optical products related to the 5G roll-out in overseas markets and China.
- Maintain BUY with a target price of HK\$5.63 based on 15x 2019 PER.

### Resilient YoY growth in Q1 2019

O-Net reported its first quarterly sales update yesterday. Its unaudited revenue is expected to be HK\$642.4m for Q1 2019, up 20.1% YoY. According to the announcement, the increase in revenue was driven by strong demand from early 5G adoption in Korea and Japan, where O-Net has entered into multi-year strategic agreements to supply optical networking products, which will help secure a portion of O-Net's production output on an ongoing basis. O-Net's Q1 2019 revenue growth was still dragged down by the weak performance of the consumer electronics segment. Based on our understanding, YoY growth of optical networking products was over 30% in Q1 2019, which is higher than overall top-line growth. O-Net's Q1 2019 top-line growth is in line with our full-year estimation of 20.6% YoY growth, and we expect the impact of the weak consumer electronics segment to fade gradually. Apart from consumer electronics, other non-optical networking product segments continued to perform well in Q1 2019. The weak operating performance of the consumer electronics segment was the reason for the margin pressure in 2018, but we expect the margin pressure to ease.

### Outperforming its peers

In our latest sector update released on 11 Apr 2019, we explained that the reasons the Taiwanese optical communications equipment segment reported a YoY decline in turnover in Mar 2019 were: a) slower demand for GPON/FTTH-related products in China by telecom operators, and b) the transition to 5G products. O-Net outperformed its peers in Q1 2019, which is in line with our conclusion that O-Net is not highly reliant on the China market, and that the Company will benefit from the 5G roll-out in overseas markets. O-Net's turnover growth in 2019 and 2020 was supported by resilient demand for optical products related to the 5G roll-out in overseas markets and China.

### Building confidence

Going forward, O-Net has promised to endeavor to provide investors with timely revenue updates for the three and nine month fiscal periods to improve transparency and communication. We maintain the view that O-Net's 2018 results will be a good reference for investors to rebuild confidence in the Company and that improvement in transparency will further boost sentiment.

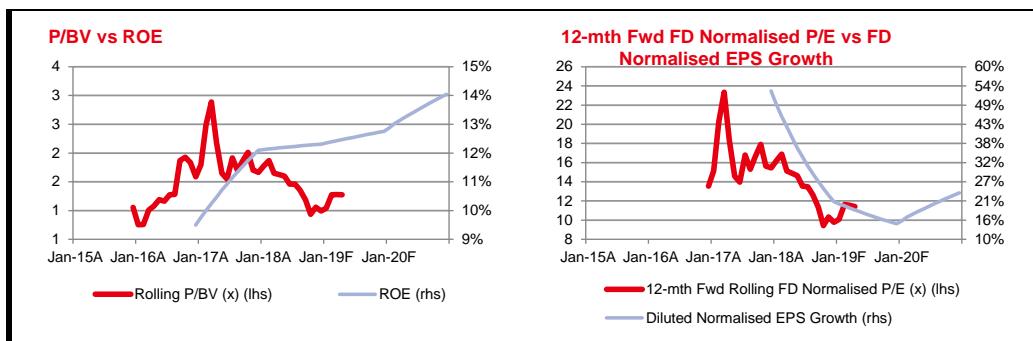

### Attractive valuation

We don't believe O-Net's current valuation of 12.1x 2019E PER and 9.8x 2020E PER looks expensive. We maintain our BUY rating with a target price of HK\$5.63 (based on 15x 2019E PER).
